News&Views: Networking to handle *Phytophthora*

Phytophthora threatens European woods and can become a more severe threat with the increase in global trade and the climate change. Two SNS research projects have focused on this microscopic pathogen. Get an insight in these two SNS networks, and also about a new Nordic cooperation to cope with extreme weather and a lot more in the...

Spring is coming closer

The days are getting brighter and spring at SNS will be busy. Two working groups are currently developing Nordic cooperation in situations of extreme weather. New networks are forming their activities. We are working hard with a project about gender issues in Nordic forestry. We will keep you updated on this and a lot more! Forward this newsletter to let more people know!

NEXT CALL, March 1st: SNS-EFINORD networks

The aim of these networks is to promote North European synergies within forest research in the Nordic, Baltic Sea and the North Atlantic regions. SNS and EFINORD share a common goal of supporting research in sustainable forest management. You might gain some from having a look at [our strategy](#) before writing your application!
