Soil as a carbon sink – knowledge overview

To meet the challenges of a changing climate, soil as a carbon sink has become a crucial tool. SNS and NKJ have gathered knowledge from throughout the Nordic region – which is now easily accessible in four short films.

In four seminars during 2021, SNS and NKJ explored issues on soil as a carbon sink. We gathered experts and stakeholders from different disciplines to learn from each other and to take this crucial topic towards the future. The conclusions are now available in these films.

Organizing a testbed: sign up for a virtual meeting

Digitalisation plays a vital role in the rapid development of the Nordic and Baltic bioeconomy. Access to cutting edge platforms for development, so-called testbeds, where new digital knowledge and technology can be developed is fundamental. But managing a testbed is a complex task. Join the virtual meeting Nov 18 to get some tools.

Towards a common Nordic management of the wild boar

300 or 300 000? How many wild boars should live in the Nordic countries?

The Nordic countries are managing the wild boar population in completely different ways. But national management is difficult when the wild boars move across borders.

A newly published report provides a knowledge base on the topic and proposals for action.
