

Introduction

This document provides you as a teacher with a practical handbook on how to focus on digitalization and gender equality within the Nordic bioeconomy in your teaching. We provide you with three different packages to choose from depending on time and knowledge constraints.

Feel free to adjust anything you want to meet your and your classes' needs. For example, you may want to translate the instructions to the students' main language. See this handbook as a guide that we think will work, but make sure you reflect on whether it will work in your class.

On the next page we provide a quick guide of what package to choose depending on different time constraints.

Introduction

	Package 1	Package 2	Package 3
Time in the classroom	0	6 h (2 lectures)	8-14 h (2 lectures and a seminar)
Time for the teacher	30 minutes	15 h	20-? (Depends on number of students in the class)
Teacher's knowledge	No prior knowledge on the concepts of gender and digitalisation is required	Basic knowledge on the concepts of gender and digitalization	Basic knowledge on the concepts and skills to lead a seminar
Students' knowledge	None	None	None
Focus	Practical tools	Knowledge raising and practical tools	Student's own awareness, knowledge raising and practical tools
