Focus areas of the call: forest damage and SNS's strategic focus areas

Nordic forests are, due to climate change, more exposed and vulnerable to damages such as fires, flood, pests and pathogens. Collaboration between nations is a vital tool to learn how to manage the risks at hand.

Gather your colleagues and apply for network funding on the issue.

We also invite networks that relate to the general focus areas of the SNS strategy:

- Forest resources as a base for value creation and rural development
- Climate change adaptation and mitigation
- Safeguarding of forest biodiversity

APPLY August 31 at the latest!

Best practice examples: cooperation between forestry and fire suppression services

How can cooperation between the forestry sector and fire suppression services in the Nordic region be most efficient and effective? A new report from Nordiska Nätverket för Skogs- och Vegetationsbrand gives best practice examples from Finland, Sweden and Norway for knowledge sharing and development possibilities for the future.

Guidelines for more gender equal networks

SNS is the initiator of several research projects focusing on gender equality in the forest sector, as well as workshops and discussion groups on the topic. SNS requires that both genders are represented by least 40% in funded networks. Realizing that gender equality can be a difficult topic to address, we have developed guidelines as a support.

SNS guides to a more gender equal digital forest sector

The method manual is an accessible guide for teachers and students to integrate digital issues from a gender perspective into forest and agricultural education. Find easily accessible and summarizing texts, videos, podcasts and other educating material aiming to create a common understanding of the subject and its challenges.
