### Cooperation makes us stronger in forest and vegetation fire fighting

How can we enhance Nordic cooperation in forest fire prevention and suppression? In a new report we give best practice examples. In a changing climate we have to expect an increase in forest fires, and we need to find ways to manage it.

### OPEN CALL: forest damage and climate change

Nordic forests are, due to climate change, more exposed and vulnerable to damages such as fires, floods, pests and pathogens. Collaboration between nations is a vital tool to learn how to manage the risks at hand.

Gather your colleagues and apply for network funding on the issue.

We also invite networks that relate to the general focus areas of the SNS strategy:

- Forest resources as a base for value creation and rural development
- Climate change adaptation and mitigation
- Safeguarding of forest biodiversity

**APPLY August 31 at the latest!**

### Education: integrate digital issues from a gender perspective

Digitalization risks reinforcing current power structures by maintaining the male dominance that exists in university education and among professionals in the digital technology.

SNS developed a method handbook that consists of easily accessible and summarizing texts, videos, podcasts and other educating material aiming to create a common understanding of the subject and its challenges and facilitate conversations to create participation and ownership over the issue.
