Still a few days left to submit your application for networking activities

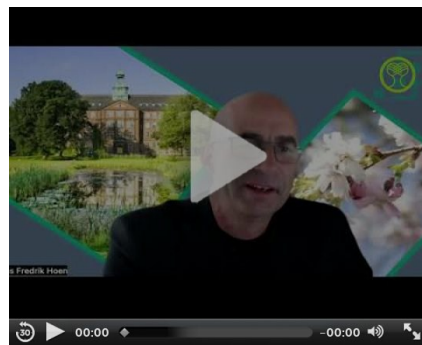

Nordic forests are more exposed and vulnerable to damages such as fire, flood, pests and pathogens due to climate change. Collaboration between nations is a vital tool to learn how to manage the risks at hand. Gather your colleagues and apply for a network fund on the issue.

Networking for future construction

NOFOBE network and the coordinator Hans Fredrik Hoen, professor at NMBU has been working for five years with different aspects of tall timber buildings. They have collected two unique data sets of how citizens perceive living and working in tall timber buildings. The data is available for researchers in other projects.

Gender equality: we need to make a change, right now

Forest and agricultural industries are two of the Nordic region's most gender-segregated sectors. Digitalization and increased automation of heavy jobs could benefit gender equality in the sectors. However, this has not happened. So SNS made a method manual for universities and other educational institutions to speed up the change!
