## The Nordic conference on reindeer husbandry November 9-10

Nordic Agri Research (NKJ), our sister organisation, is planning The Nordic Conference on reindeer husbandry 9-10 November 2022. The conference will be held at NIBIO Svanhovd, Pasvik, Norway. Join to discuss...

- challenges to reindeer husbandry, in particular the impact of predators
- consequences of a changing climate

More information will soon be available in any of the NKJ social channels: [Facebook](#), [Twitter](#), [LinkedIn](#).

## OPEN CALL for research networks and projects – SNS 50 years!

SNS celebrates the anniversary with an open call for research networks and projects.

**The overall focus** of this call is resource management and biodiversity in Nordic forests, with emphasis on the development of Nordic forests and the interaction between resource management and biodiversity. Looking forward, how can we use the knowledge provided by research during the past 50 years?

**Deadline:** October 14, 2022 at 24:00 CEST

## SNS board youth member: Hjördís Jónsdóttir, Iceland

SNS board always includes a youth member to keep up to date with the development in the Nordic forest sector and to make the voice of the younger generation heard.

2022-2023 Hjördís Jónsdóttir, forestry student in Iceland, represents the younger generation. Welcome!

**Rolf Björheden, coordinator NB-NORD:**

## "We have standardized research methods for Nordic synergies"

The coordinator of the SNS funded network NB-NORD, Rolf Björheden, tells about the achievements of the network the last years and the benefits of cooperating over the Nordic national borders in forest research.

## Historical factors in spatial variation in surface soil carbon

"Our results emphasize that boreal forest surface soil C stocks are highly variable in size across fine spatial scales, shaped by an interplay between historical forest fires, ecosystem productivity, forest floor vegetation, and hydro-topography."

Read the article in Scandinavian Journal of Forest Research.

## "The effect of Joule heating on collapse and water absorption of wood"

"The effect of Joule heating on collapse, shrinkage, water absorption and compressive strength of timber was investigated. Results indicate that the tangential and volumetric collapse reduced significantly by ~53% and ~48%, respectively, with Joule heating in Eucalyptus nitens."
