# Bioeconomy Hackathon 2025

May 27–28 2025, Saarijärvi, Finland

Want to explore innovative solutions for reducing  $\text{CO}_2$  emissions and advancing sustainable energy practices?

Are you a student in the Nordic or Baltic region, studying computer science, engineering, agriculture, forestry, marine sciences, bioenergy, environmental studies, or a related field?

**Participate in an all expenses-paid weekend of finding solutions to bioeconomy challenges!**

The hackathon will include networking events, social activities, event dinners, mentoring and other group activities to enable you to get to know your peers and the experts.
